

Research Technician

The Research Institute of Molecular Pathology (IMP) in Vienna pursues world-class research in basic molecular biology. It is located at the Vienna BioCenter and largely sponsored by Boehringer Ingelheim. With over 200 scientists from 40 countries, the IMP is committed to scientific discovery of fundamental molecular and cellular mechanisms underlying complex biological phenomena. We are looking for a part- or full-time Research Technician.

The lab's research focuses on understanding the molecular mechanisms underlying regeneration in amphibian models and promoting regeneration in mammalian models. The lab employs a wide array of molecular biology, histology and in vivo approaches to identify proregenerative mechanisms.

The responsibilities for this position will be:

- · Amphibian transgenesis
- · Routine molecular biology techniques (PCR, cloning)
- · Cellular assays (tissue culture, proliferation assays, FACS)
- Mouse work
- · General lab support (managing equipment, supplies, and reagents)
- · Training of new lab members

Your qualifications:

- · Bachelor, Master, or PhD degree (or equivalent) with strong wet-lab experience
- · High motivation to work in an international, fast-paced environment
- \cdot Willingness to handle mice
- $\boldsymbol{\cdot}$ Previous experience with amphibian or fish is an asset
- · Tissue culture and FACS experience is an asset
- · High accuracy, reliability, precision under time pressure
- · Accurate math skills
- · Willingness to perform routine tasks
- · Ability to effectively prioritize and manage multiple tasks
- · Excellent organizational skills
- · Friendly, collaborative, and pro-active mindset
- · Good English-language communication skills (German skills are not required)

Our offer:

We offer a dynamic lab, an international work environment (employees come from 40 different countries) and a chance to make an important contribution to basic biomedical research. The position also offers opportunities for further training in multidisciplinary techniques spanning molecular biology, genetics, biochemistry, and animal work. The annual gross salary will be € 31.024 or higher, – full-time (40 hrs/week), depending on qualification and experience. Current position is for two years.

Applications, including a letter of motivation describing the reason of your interest in this position and past research experiences, a CV and the names and contact details of two referees should only be made *online*. Evaluation of applications/interviews will begin on 01.02.2018 and continue until the position is filled. We look forward to your application and meeting you in person.
